Section 1132	Introduction	2
Section 1133	Investment Factors	3
Section 1134	Authorized and Prohibited Investments	4-7
Section 1135	Investment Specifics	8
Section 1136	Responsibility and Review	9

SECTION 1132. INTRODUCTION

1132.01 **Responsibility** - The General Manager, or authorized designee, is responsible for investing the cash balances in all District funds in accordance with the California Government Code, Sections 53600 et seq. and 53635 et seq. This policy does not include Long Term Debt Reserve Funds and Deferred Compensation Funds, which are exceptions covered by other more specific Government Code sections and the legal documents unique to each debt transaction.

1132.02 **Prudent Investor Standard** - The standard of prudence to be used by the General Manager and other individuals assigned to manage the investment portfolio shall be the "prudent investor" standard which states, in essence, that "in investing... property for the benefit of another, a trustee shall exercise the judgment and care, under the circumstances then prevailing, which men of prudence, discretion and intelligence exercise in the management of their own affairs..." (Civil Code Sect. 2261, et seq.) This standard shall be applied in the context of managing an overall portfolio. These individuals acting in accordance with written procedures and the investment policy and exercising due diligence shall be relieved of personal responsibility for an individual security's credit risk or market price changes, provided deviations from expectations are reported in a timely fashion and appropriate action is taken to control adverse developments.

1132.03 **Investment Intent** - It is the District's full intent, at the time of purchase, to hold all investments until maturity in order to ensure the return of all invested principal. However, it is realistically anticipated that market prices of securities purchased as investments will vary depending on economic conditions, interest rate fluctuations, or individual security credit factors. In a well-diversified investment portfolio, such temporary variations in market value will inevitably result in measurable losses at any specific point in time. From time to time, changes in economic or market conditions may dictate that it is in the District's best interest to sell a security prior to maturity.

SECTION 1133. INVESTMENT FACTORS

1133.01 **Principal Investment Factors** - The three principle investment factors of **Safety, Liquidity and Yield** are to be taken into consideration, in the specific order listed, when making any and all investment decisions.

1133.01.1 **Safety** of principal is the foremost factor to be considered during each investment transaction. Safety in investing refers to minimizing the potential for loss of principal, interest or a combination of the two due to the two types of risk, Credit Risk and Market Risk.

1133.01.1.1 Credit Risk, defined as the risk of loss due to failure of the issuer of security, shall be mitigated by only investing in very safe, or "investment grade" securities and diversifying where feasible.

1133.01.1.2 Market Risk, defined as market value fluctuations due to overall changes in interest rates shall be mitigated by limiting the average maturity of the investment portfolio to less than 3 years, with a maximum maturity of any one security of 5 years without prior Board approval. Also, the portfolio will be structured based on liquidity needs so as to avoid the need to sell securities prior to maturity.

1133.01.2 **Liquidity** refers to the ability to convert an investment to cash promptly with minimum risk of losing some portion of principal or interest. The investment portfolio will be structured based on historic cash flow analysis in order to provide the necessary liquidity as investments routinely mature. A portion of the portfolio will be maintained in liquid short term securities which can be converted to cash if necessary to meet unforeseen disbursement requirements.

1133.01.3 **Yield** is the average annual return on an investment based on the interest rate, price, and length of time to maturity. The District attempts to obtain the highest yield possible, provided that the basic criteria of safety and liquidity have been met.
