SCOPE OF WORK

Superior Tank Solutions Company, Inc. (STSI) agrees to furnish all necessary labor, tools, equipment, supplies, insurance and supervision to perform following scope of work:

Exterior Recoating-

- Apply biodegradable cleaning agent to any existing galvanized surfaces (bolt heads and nuts) to be overcoated in order etch and provide proper foundation for adhesion of prime coat.
- Pressure wash all existing exterior tank shell surfaces, site piping and appurtenances at a minimum of 3000 psi in order to remove all loosely adherent coatings and deleterious materials.
- Prepare all existing bare steel areas and mechanical damage in accordance with SSPC SP-2 Hand Tool Cleaning and SPC SP-3 Power Tool Cleaning and achieve a smooth transition edge from the bare steel to the existing properly adhered coatings.
- Apply one spot prime coat of VOC compliant surface tolerant industrial acrylic primer to all previously properly prepared bare steel areas at a minimum of 2.0 mils DFT.
- Apply one full prime coat of VOC compliant surface tolerant industrial acrylic primer to all previously properly prepared bare steel areas at a minimum of 2.0 mils DFT.
- Apply one full finish coat of VOC compliant industrial acrylic semi-gloss finish coat to all previously properly primed tank exterior surfaces and piping appurtenances at a minimum of 2.5 mils DFT.
- Exterior finish color shall be selected and approved by the Owner prior to application.
- Perform all necessary touch up and general site cleanup and disposal of debris generated from exterior coating operations per local, state and federal requirements.
